

Runsense SF-310G

DATASHEET

The SF-310 features highly accurate GPS tracking and an amazing 30-hour battery life so you can dare to go another mile. You can view real-time data at a glance on its four customisable screens.

Accurately keep track

Always know your progress with this accurate and intelligent GPS sports monitor, featuring smart device compatibility. Easily connect to your smart device using Bluetooth Smart connectivity. Sync the SF-310 with your phone to enable fast GPS positioning with the AGPS function to get you on your run faster.

Helping you to train smarter

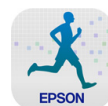

Runsense lets you track your progress against long-term targets, designed to improve your performance. It even lets you view your estimated finishing time or distance based on a set target, and you can improve your performance using the interval training mode. The free Runsense View portal and Run Connect app¹ help you customise your settings, and monitor, analyse, compare and even share your stats to maximise your potential. With four customisable screens, select up to three measurements on each, chosen from a huge range of options.

Train your way, for longer

Its active GPS battery life of 30 hours - up to three times longer than comparable competitor products² - means you can keep on running for longer before having to recharge. Water resistant up to 5ATM, and with a compact, lightweight design, the SF-310 is designed to fit into your lifestyle. Use it with an optional heart rate chest strap to add another dimension to your training.
